

# **1959 INDEX**

## **Public Health Reports**

**Volume 74, January–December**

*and*

**Public Health Monographs**

**Numbers 56–60**

**T**HIS INDEX to *Public Health Reports* and Public Health Monographs is divided into a subject index and an author index.

The subject index carries one or more entries for each item published. In addition to the subject headings, categorical headings include ANNOUNCEMENTS (EXAMINATIONS, ORGANIZATIONS, PERSONNEL), CONFERENCE REPORTS, DEATHS, LEGAL NOTES, and MONOGRAPHS.

Public Health Monographs published concurrently with *Public Health Reports* in 1959 are listed in numerical order under the category heading MONOGRAPHS. The monograph summaries appearing in the journal are indexed under appropriate subject headings.

One asterisk before the page number indicates an original, signed article. The sign of two asterisks, used only in the author index, indicates a monograph. Entries without any symbol may refer to summaries or briefs of papers presented at conferences, narrative conference reports, statements or reports of committees, short reports without authors, or similar items.

Illustrative material on the inside of the front cover of each issue is indexed by month under the heading FRONTISPIECES. It is recommended that the covers be included in a bound volume.

An annual list of Public Health Service publications may be obtained from the Public Inquiries Branch, Office of Information.

## EDITOR'S CORRECTION

In the article entitled "Inapparent Infection: Relation of Latent and Dormant Infections to Microbial Persistence," by Walsh McDermott, M.D., *Public Health Reports*, June 1959, the seven paragraphs beginning with "It might well be questioned . . ." on page 493, middle of the first column, and ending with ". . . with dysentery bacilli" on page 494, bottom of first column, should be inserted on page 489, second column, preceding the subhead "The Antimicrobial Drug."

PUBLIC HEALTH REPORTS welcomes from any source contributions of value to public health.

Most of the readers of *Public Health Reports* are practicing public health officials. About 10 percent of the monthly circulation of *Public Health Reports* goes overseas. About half of the domestic circulation goes to Federal, State, and local government agencies concerned with health and related health interests. A quarter goes to institutions accredited for teaching in health and related fields, to teachers, and libraries. The journal also reaches research institutions, hospitals, and professional and voluntary public health organizations.

Manuscripts are reviewed with the understanding that they have not been committed for publication elsewhere. Appropriate information should be provided if papers have been given or are prepared for presentation at a meeting. Opinions expressed are the authors' and do not necessarily reflect the views of *Public Health Reports* or the Public Health Service. Trade names are used for identification only and do not represent an endorsement by the Public Health Service.

Authors will facilitate review and publication if they submit at least four copies of their manuscripts. All copy should be typed double spaced, and each page should end on a completed paragraph. Of course, several paragraphs may appear on a typed page.

References should be given in the style used by *Public Health Reports*.

Footnotes should be worked into the text or offered as supplemental items.

Authors are expected to recognize scientific contribu-

tions by those who have assisted in their papers only if such contributions warrant mention in the text or in the paragraph identifying the authors. It is not the policy of *Public Health Reports* to publish "acknowledgments."

*Public Health Reports* does not ordinarily publish papers which exceed 5,000 words.

In lieu of reprints, senior authors are provided with 50 sets of tear sheets after publication. Associate authors receive a smaller number.

Librarians and others should preserve their copies for binding, as the Public Health Service does not supply bound copies. Indexes are published each year.

*Public Health Reports* is listed in the *Quarterly Cumulative Index Medicus* (American Medical Association), in the *Current List of Medical Literature* (National Library of Medicine), and in the *Engineering Index*.

PUBLIC HEALTH MONOGRAPHS are edited and issued by *Public Health Reports* under the general direction of the Board of Editors.

Public Health Monographs are listed in the table of contents of the issue of *Public Health Reports* with which they are concurrently published.

Most Public Health Monographs are placed on sale by the Superintendent of Documents; series subscriptions are not available. Monographs are not included in subscriptions to *Public Health Reports*.
